1. Brand Strategy Verbal Identity

This section defines who we are before we define what we look like.

1.1 Mission and Vision

- **Mission:** To cultivate joy, wellness, and community connection through premium, approachable cannabis experiences.
- **Vision:** To destigmatize cannabis by presenting it through a lens of vibrant positivity and professional care.

1.2 Brand Voice and Tone

Our voice is **Modern, Vibrant, and Approachable**. We sound like a knowledgeable friend, not a clinical doctor or a "stoner."

We Are...	We Are Not...
Friendly & Warm	Overly casual or slang-heavy
Educational	Condescending or Academic
Premium	Exclusive or Snobbish
Vibrant	Chaotic or Loud

1.3 Vocabulary and Copywriting Rules

Do Not Use: "Weed," "Pot," "Dope," "Stoned," "High" (unless referring to specific effects in a regulated context).

Do Use: "Cannabis," "Flower," "Elevated," "Experience," "Wellness," "Joy."

Grammar: Use sentence case for headlines to maintain our "approachable" nature.

2. Logo Architecture

2.1 Primary Logo and Clear Space

Primary Wordmark: Includes "Joyology" + "Cannabis" tagline. This is the preferred logo version for most applications.

Clear Space Requirements: While the absolute minimum is 30px on all sides, the **Standard Safe Zone** is defined by the height of the letter "o" in the logo. No other graphic elements may breach this zone.

2.2 Logo Variations

Primary Wordmark With Cannabis Tagline

The preferred logo for all cannabis-friendly environments and communications.

Alternative Wordmark Without Cannabis Tagline

Use this version when:

- Advertising on platforms with cannabis-related restrictions (Google Ads, Facebook Ads, certain digital platforms)
- General public-facing marketing where explicit cannabis references may be restricted
- Co-branded partnerships where the partner requires discretion
- Merchandise intended for general retail environments
- Media appearances or publications with editorial guidelines against cannabis terminology

Color Variations Both Logo Versions

- **Full Color:** Use on White or very light backgrounds (Primary).
- **Reverse (White):** Use on Solid Green (#8CC541) or dark photography.
- **Monotone (Black):** Use for thermal receipts, regulatory paperwork, and single-color print ads.

2.3 Social Media Token

The "Three-Circle Icon" is our social token and can be used as a standalone mark when space is limited.

Background: When used as a profile picture, the icon must sit on a white background or the specific Light Green (#C8DC64) background.

Centering: Visually center the three dots (accounting for optical weight), not just geometric center.

2.4 Minimum Sizes

- Wordmark Logo: 120px width minimum

- Icon Logo: 40px width minimum

2.5 Usage Examples

✓ CORRECT

Logo on clean background with
proper spacing

✗ INCORRECT

Do not alter logo colors or place
on busy backgrounds

3. Color System and Accessibility

3.1 Primary Palette

Our color palette reflects the natural, vibrant, and energetic personality of the Joyology brand.

Joyology Green

Format	Value
HEX	#8CC541
RGB	140, 197, 65
CMYK	45, 0, 67, 23
PMS	360 C (Approx)

Light Green

Format	Value
HEX	#C8DC64
RGB	200, 220, 100
CMYK	21, 0, 55, 14
PMS	380 C (Approx)

Blue Green

Format	Value
--------	-------

Acid Yellow

Format	Value
--------	-------

HEX	#80C9AB
RGB	128, 201, 171
CMYK	45, 0, 25, 21
PMS	564 C (Approx)

HEX	#E2F752
RGB	226, 247, 82
CMYK	13, 0, 71, 3
PMS	386 C (Approx)

3.2 Blue Accent

Sky Blue: Hex #41C6EF (Derived from gradient settings). Use sparingly for digital links and gradient endpoints.

3.3 Accessibility and Usage Rules

Text Contrast Rule: Never use White text on **Acid Yellow** or **Light Green**. It fails ADA accessibility standards. Use Dark Grey or Joyology Green text on these backgrounds.

The 60-30-10 Rule:

- **60% White/Clean Space:** To maintain the "clean, minimalist" look.
- **30% Joyology Green:** Primary headers, buttons, borders.
- **10% Acid Yellow/Gradient:** Highlights, CTAs, and "pop" elements.

3.4 Gradients

The "Joy" Gradient: Linear 90deg | Acid Yellow (#E2F752) to Sky Blue (#41C6EF).

Usage: Button hovers, photo overlays, digital backgrounds. Never use for body text.

CSS:

```
background: linear-gradient(90deg, #E2F752 0%, #41C6EF 100%);
```

3.5 Extended Palette

The extended palette provides essential colors for content hierarchy, product categorization, and functional UI elements. These colors complement the primary palette without replacing it.

Neutral Suite, Content and Backgrounds

Professional brands rarely use pure black (#000000) as it creates eye strain. Our neutral suite provides depth and hierarchy:

Deep Root

Format	Value
HEX	#1A1F1C
RGB	26, 31, 28
Usage	Primary body text (Soft Black)

Cloud

Format	Value
HEX	#F4F7F5
RGB	244, 247, 245
Usage	Website section backgrounds

Silver

Format	Value
HEX	#9BA5A1
RGB	155, 165, 161
Usage	Secondary text, timestamps, captions

Strain Navigation System

In cannabis retail, color is functionality. Customers recognize effects by color. While our primary palette leans toward energizing "Sativa" colors, the strain navigation system provides balance across all product categories:

Dream Violet

Format	Value
HEX	#6B5B95
RGB	107, 91, 149

Sunburst Orange

Format	Value
HEX	#FF9F1C
RGB	255, 159, 28

Category	Indica
Usage	Indica strain labels, "Calm," "Sleep," "Relax" products

Category	Sativa
Usage	Sativa strain labels, "Energy," "Focus," "Uplift" products

Deep Teal

Format	Value
HEX	#2A7C6F
RGB	42, 124, 111
Category	Hybrid
Usage	Hybrid strain labels, "Balance," "Wellness" products

Functional Alert Colors and Digital UI

For digital applications, websites, and apps, functional colors communicate status and guide user actions. These colors are calibrated to harmonize with the Joyology Green palette:

Alert Red

Format	Value
HEX	#E04F5F
RGB	224, 79, 95
Usage	Error messages, form validation, "Sold Out" tags

Warning Amber

Format	Value
HEX	#F5A623
RGB	245, 166, 35
Usage	Low inventory alerts, age-gate warnings, caution messages

Success Green

Format	Value
HEX	#4CAF50
RGB	76, 175, 80
Usage	Success messages, form confirmations, "In Stock" badges

Extended Palette Usage Guidelines

- **Neutrals:** Use Deep Root instead of pure black for all body text. Cloud provides subtle section separation without harsh lines.
- **Strain Colors:** Apply consistently across all product touchpoints (menus, labels, packaging, digital filters). Never mix strain color logic.
- **Functional Colors:** Reserve exclusively for UI status messages. Do not use Alert Red or Warning Amber for decorative purposes.
- **Hierarchy:** Primary palette colors take visual priority. Extended palette colors support but never dominate the design.

3.6 Branded Background Assets

A curated collection of branded gradient backgrounds featuring geometric "Joy Dots" patterns. These assets are optimized for social media, digital applications, and marketing materials. Each background maintains brand consistency while offering creative flexibility.

Background Asset Library

All backgrounds feature subtle geometric circles at varying opacities (10-30%) to create depth and visual interest.

Coral Pink
Gradient

Gradient: #FF6B6B →
#FF85A6

Use for: Valentine's,
breast cancer
awareness, special
events

Fresh Green
Gradient

Gradient: #A4D65E →

#2A7C6F

Use for: Hybrid
products, balance
themes, core brand
content

Sky Blue Gradient

Gradient: #5BC4DB →
#41C6EF

Use for: Clarity
products, focus themes,
digital platforms

Gradient Specifications

All gradient backgrounds use a **180-degree linear gradient** (top to bottom) for consistency across platforms.

Background Name	Start Color	End Color	CSS Code
Coral Pink Gradient	#FF6B6B	#FF85A6	<code>linear-gradient(180deg, #FF6B6B 0%, #FF85A6 100%)</code>
Fresh Green Gradient	#A4D65E	#7DC242	<code>linear-gradient(180deg, #A4D65E 0%, #7DC242 100%)</code>
Sunburst Orange Gradient	#FF9F1C	#FF6B35	<code>linear-gradient(180deg, #FF9F1C 0%, #FF6B35 100%)</code>
Dream Violet Gradient	#E17FB8	#6B5B95	<code>linear-gradient(180deg, #E17FB8 0%, #6B5B95 100%)</code>
Emerald Green Gradient	#3DBE7B	#2A7C6F	<code>linear-gradient(180deg, #3DBE7B 0%, #2A7C6F 100%)</code>
Sky Blue Gradient	#5BC4DB	#41C6EF	<code>linear-gradient(180deg, #5BC4DB 0%, #41C6EF 100%)</code>

Usage Guidelines For Background Assets

- **Social Media:** Use these backgrounds for Instagram posts, Stories, Facebook graphics, and Twitter/X content.
- **Digital Advertising:** Perfect for display ads, social media ads, and promotional banners.
- **Product Categories:** Match background colors to product effects (Orange = Sativa, Violet = Indica, Green = Hybrid).
- **Seasonal Campaigns:** Coral Pink for Valentine's/special events, Sky Blue for summer campaigns.
- **Logo Placement:** These backgrounds work best with the **white logo version** for maximum contrast.
- **Text Overlays:** Use white or very light text on these backgrounds. Ensure sufficient contrast for readability.

Customization Flexibility

While these backgrounds are optimized and ready-to-use, you may add:

- White logo (preferred for these gradients)
- Product photography with transparent backgrounds
- Text callouts in All Round Gothic font (white or very light colors)
- Additional "Joy Dots" at 5-10% opacity for enhanced depth

Do Not: Alter the base gradient colors, add heavy filters, or place the full-color logo on these backgrounds (use white logo only).

4. Typography System

4.1 Display: All Round Gothic

Used for Headlines and Titles. All Round Gothic provides a modern, friendly, and professional appearance that aligns with our brand personality.

Tracking: Set to 0 or +10 for legibility.

Weight Usage:

- **Bold (700):** Main Headlines (H1)
- **Demi (600):** Subheads (H2)
- **Book (400):** Intro paragraphs (large size)

Extra Light 200

ABCDEFGHIJKLMNOPQRSTUVWXYZ

abcdefghijklmnopqrstuvwxyz

123567890

Bold 700

The quick brown fox jumps over the lazy dog

ABCDEFGHIJKLMNOPQRSTUVWXYZ

abcdefghijklmnopqrstuvwxyz

4.2 Body Copy: The Modern Alternative

While Arial/Helvetica is the fallback, for branded materials (Web/Print), we recommend a Google Font pairing that matches the rounded aesthetic:

- **Primary Web Font:** Nunito or Quicksand (Rounded sans-serifs that complement All Round Gothic).
- **System Fallback:** Arial/Helvetica (Only when web fonts fail).
- **Body Text Size:** Minimum 16px for legibility.
- **Line Height (Leading):** 1.5x font size (e.g., 16px font / 24px line height) to ensure the "clean, minimalist" feel.

4.3 Typography Hierarchy

H1 Heading — Bold 700

H2 Heading — Demi 600

H3 Heading — Medium 500

H4 Heading — Book 400

Body Text — Arial/Helvetica (16px minimum)

Caption Text — Arial/Helvetica (14px)

5. Imagery and Art Direction

To reflect our "Modern, Vibrant" personality, photography must be consistent.

5.1 Photo Style

Lighting: High-key, bright, natural sunlight. Avoid dark, moody, or "club" lighting.

Subjects:

- *Lifestyle:* Candid moments of joy, hiking, social gatherings (without active consumption shown).
- *Nature:* Macro shots of greenery, dew drops, sunlight through leaves (connecting to the "Green" palette).

Treatment: Clean edits. Slightly increased saturation/vibrance. No vintage filters or sepia tones.

5.2 Graphic Elements

The "Joy Dots": The three circles from the logo can be used as a watermark pattern (opacity 10%) on packaging or website backgrounds.

6. Cannabis Compliance and Packaging

6.1 Packaging Architecture

- **Strain Labels:** Strain names should be set in **All Round Gothic Demi** to match the brand hierarchy.
- **Warning Labels:** Regulatory text must be set in Arial/Helvetica (sans-serif) at the state-mandated minimum size (usually 6pt-8pt), in 100% Black on a White background for maximum contrast.
- **Logo Placement:** The Joyology logo must never be obscured by tax stamps or safety seals.

6.2 Retail Signage

21+ Verification: All digital and physical entry points must feature "21+ Only" signage using the **All Round Gothic** font to maintain brand consistency even on regulatory signs.

7. Digital Applications

7.1 Buttons and UI

- **Primary Button:** Joyology Green Background, White Text, Rounded Corners (25px radius).
- **Secondary Button:** Transparent Background, Joyology Green Border (2px solid).
- **Gradient Button:** Use the "Joy Gradient" for "Special Offers" or "Join Rewards" buttons.

Primary Button

Secondary Button

Gradient Button

7.2 Favicon

Use the three colored dots on a white circle background. Do not try to fit the word "Joyology" into a 16x16 pixel browser tab icon.

Favicon / Social Token

8. Social Media Guidelines

Social media is a dynamic, creative space where the Joyology brand can express personality while maintaining consistency. These guidelines provide flexibility for engaging content while protecting brand integrity.

8.1 Logo Usage on Social Media

Critical Rule: The logo itself must *always* remain in brand colors—either the **full color version** (gradient green) or the **white version**. Never alter the logo to use off-brand colors.

However, **background colors and design elements** outside our brand palette are acceptable for social media content, provided the logo maintains proper contrast and readability.

Approved Logo Versions for Social Media

- **Full Color Logo:** Use on white, light backgrounds, or any color where the gradient green text remains legible.
- **White Logo:** Use on dark backgrounds, photography, or any of the brand colors (Joyology Green, Light Green, Blue Green, Dream Violet, Deep Teal, etc.).
- **NEVER:** Change the logo colors to match non-brand backgrounds. The logo stays full color or white only.

Background Color Flexibility

Social media content may use creative backgrounds including **colors outside the brand palette**:

- **Brand colors** from primary and extended palettes (preferred)
- **Off-brand colors** for seasonal campaigns, special events, or creative expression (acceptable)

- Gradient backgrounds (brand "Joy Gradient" preferred, but custom gradients allowed)
- Photography with logo overlay (ensure readability with white logo on dark images)
- Textured backgrounds in any color
- Neutral backgrounds (Cloud, Silver, Deep Root, or other grays)

Example: A Halloween post may use orange and black backgrounds, or a Pride post may use rainbow colors—but the Joyology logo must remain in its full color or white version, never altered to match the theme colors.

Contrast Requirements

Critical Rule: The logo must always maintain strong contrast with its background.

- **Light Backgrounds (White, Cloud, Light Green, Acid Yellow):** Use full color logo only.
- **Dark Backgrounds (Deep Root, Dream Violet, Dark Photography):** Use white logo only.
- **Medium Backgrounds (Joyology Green, Blue Green, Deep Teal):** Test both versions; use whichever provides better contrast.

8.2 Profile Images and Avatars

For consistent brand recognition across platforms, profile images should follow these specifications:

- **Primary Option:** Joyology Cannabis white logo on Joyology gradient background with geometric patterns (recommended for all platforms)
- **Alternative Option:** Three-circle icon on white background
- **Alternative Option:** Three-circle icon on Light Green (#C8DC64) background
- **Full Wordmark:** May be used for cover photos or header images (not recommended for small circular avatars)

Geometric Background: When using the gradient background for profile pictures, incorporate subtle geometric shapes or the "Joy Dots" pattern at 10-15% opacity to add visual interest while maintaining logo readability.

8.3 Platform Specific Recommendations

Instagram

- **Profile Picture:** White Joyology Cannabis logo on gradient background with geometric patterns (primary recommendation).
- **Feed Posts:** Flexible backgrounds encouraged. Use brand colors, gradients, or photography.
- **Stories:** White logo on creative backgrounds. Maintain clear space around logo.
- **Highlights:** Three-circle icon on brand color backgrounds for category organization.

Facebook

- **Profile Picture:** White Joyology Cannabis logo on gradient background with geometric patterns (primary recommendation).
- **Cover Photo:** Full wordmark logo with tagline; may use gradient or photography backgrounds.
- **Posts:** Flexible—use full color logo on light backgrounds or white logo on brand colors.

Twitter or X

- **Profile Picture:** White Joyology Cannabis logo on gradient background with geometric patterns (primary recommendation).
- **Header Image:** Full wordmark with creative backgrounds (photography, gradients, brand colors).
- **Posts:** Logo usage optional; when included, follow contrast rules.

- **Profile Picture:** White Joyology Cannabis logo on gradient background with geometric patterns, or full color wordmark logo on white background (professional standard).
- **Banner:** Clean, professional aesthetic—use Joyology Green with white logo or white background with full color logo.

8.4 Content Style Guidelines

While background colors and design elements are flexible (including off-brand colors for special occasions), maintain these content standards:

- **Logo Colors:** Always use full color or white logo versions. Never alter logo colors.
- **Background/Design Colors:** Brand colors preferred, but off-brand colors acceptable for creative campaigns and seasonal content.
- **Tone:** Friendly, warm, educational—consistent with brand voice (Section 1.2).
- **Imagery:** High-key, bright photography (Section 5.1). Avoid dark, moody aesthetics.
- **Typography:** Use All Round Gothic for text overlays on images when possible.
- **Hashtags:** Use #Joyology, #JoyologyCannabis, and strain-specific tags.
- **Emojis:** Allowed sparingly—🌿, ✨, ❤️ align with brand personality.

8.5 Social Media Dos and Donts

✓ DO

- Use white or full color logo versions only

✗ DON'T

- Change the logo colors to match backgrounds (logo stays full color or white)

- Ensure strong contrast between logo and background
- Use brand colors for backgrounds (preferred)
- Use off-brand colors for backgrounds and design elements when needed
- Maintain logo clear space on all backgrounds
- Test readability on mobile devices
- Use the "Joy Gradient" for special posts

- Alter, recolor, or customize the logo for themed posts
- Place logo on busy backgrounds where it's unreadable
- Distort, rotate, or stretch the logo
- Use slang or prohibited vocabulary (Section 1.3)
- Post dark, moody, or "stoner" aesthetic content
- Show active cannabis consumption

8.6 Asset Specifications by Platform

Platform	Asset Type	Dimensions	Logo Version
Instagram	Profile Picture	320 x 320px	White logo on gradient w/ geometric background
Instagram	Feed Post	1080 x 1080px	Flexible (maintain contrast)
Instagram	Story	1080 x 1920px	White logo preferred
Facebook	Profile Picture	180 x 180px	White logo on gradient w/ geometric background
Facebook	Cover Photo	820 x 312px	Full wordmark (flexible background)
Twitter/X	Profile Picture	400 x 400px	White logo on gradient w/ geometric background

Twitter/X	Header Image	1500 x 500px	Full wordmark (flexible background)
LinkedIn	Profile Picture	300 x 300px	White logo on gradient or full color on white
LinkedIn	Banner	1584 x 396px	Professional aesthetic (white or green)
